## **FASTENER INVOICING SOFTWARE**

“WE TRAK” is a complete software program designed for body and glass shops to create supplemental invoices for fasteners and shop supplies. The ability to produce receipts that are acceptable to the insurance companies should make the small amount of data entry well worth the time required.

“WE TRAK” features the following:

- Complete listing of W&E part numbers; with descriptions and per piece cost pricing.
- A markup recalculation feature allowing the shop to set their own profit margin.
- A customer database section to store and maintain customer records.
- Other supplies used in the shop can be added to the system as needed.

Each “WE TRAK” software program is shipped with the W&E distributor’s name, address and phone number hard coded into the program. Once installed on the shop’s computer, call to register the program with W&E. All we need is the shop name and a password will be issued.

Updates for new items and any price changes will be available by email-  
Part number **WTUE** or by CD- Part number- **WTUCD**.

The “WETRAK3” program offers the following new features:

- 1.-The ability to receive scanned information into the program. Eliminates the need to manually key information into the system. Use your own barcode scanner.
- 2.-Inventory control- helps keep track of your hardware usage while allowing you to maintain an adequate supply of body fasteners. Jobbers may scan the label on the W&E parts box and the inventory will automatically update.
- 3.-The ability to produce your own bin labels containing the part number, description and a bar code for any part entered into the system.
- 4.-Use your existing computer or net book to run the software.

There are two ordering options:

- 1.- **WETRAK**- Basic part invoicing program.
- 2.- **WETRAK3®**- software program for shops who prefer to use their own scanner & track inventory.

(Simply install the software on your existing computer, call W&E Sales to register your program.)
